NORTHEAST REGIONAL CONSERVATION NEEDS GRANT
2014 PROGRESS REPORT

Quarter: (circle one) 2014 1st 2014 2nd 2014 3rd 2014 4th

Grant Program, Number and Title: RCN grant 2012-03 Evaluation of Prevalence of Fungal Dermatitis in New England Timber Rattlesnake Populations

Organization: Roger Williams Park Zoo

Project Leader: Lou Perrotti

Abstract: Please provide a short (1-2 paragraphs) abstract that addresses EACH of the following: the objectives of your project, accomplishments to date, future plans and timelines with an estimate for when the project will be completed.

We received 10 snakes in the last quarter. This brings our final total of snakes sampled to 98. Our original goal was 200 snakes but due to some challenges with biologist time and the overlap with another national fungal dermatitis in snakes grant we were not able to reach the goal. We still feel that we have achieved a useful number of sampled snakes to provide the population managers with some information on the prevelance of fungal dermatitis in their populations. We also believe that this sample size will allow for successful publication of the data in widely read scientific journals.

In addition to sampling the last snakes, we also submitted all pending labwork (and all results have been returned to us). This information has been added to the datasheets and the data has been submitted to a statistician for analysis.

Still remaining to do on this project is:

1) Once statistical analysis is back, send a final report to each population manager
2) Prepare manuscript for publication
3) Present data at local conferences

The data collection component of this project is complete.

Were planned goals/objectives achieved last quarter?

We did not meet our original sample collection goals. We originally hoped to collect 50 samples in the fall. The fall collection period spans both 3rd and 4th Quarters. Since the other rattlesnake project is in place now, the participation in this project from some biologists is reduced. We were able to sample 17 of the 50 samples between the 3rd and 4th Quarters.

Progress Achieved: (For each Goal/Objective, list Planned and Actual Accomplishments)

Objective	Planned	Accomplished
Obtain an overall health assessment of multiple New England Timber Rattlesnake populations and determine the prevalence of skin lesions within each population	50 samples*	10 samples
Determine the prevalence of fungal dermatitis via biopsy of any lesions identified	50 samples*	10 samples
Determine the identification of any fungal organisms on biopsy by polymerase chain reaction testing with ITS2 sequencing	50 samples*	10 samples
Obtain baseline hematological values and compare values between individuals with or without the presence of fungal dermatitis	50 samples*	10 samples
Obtain baseline plasma biochemical values and compare	50 samples*	10 samples

values between individuals with or without the presence of fungal dermatitis		
Determine prevalence of ophidian paramyxovirus in New England Timber Rattlesnake populations using polymerase chain reaction and association with the presence of skin lesions	50 samples*	10 samples
Determine presence of heavy metals or toxins in individuals and association with the presence of skin lesions	50 samples*	10 samples

** Note that the 50 samples will span both 3rd and 4th quarters.*

Difficulties Encountered:

1. Many of the population biologists had stopped supplying samples. This is due to a number of factors including:
    a. Transport of snakes to local veterinarians was taking too much staff time
    b. Reduced population monitoring due to budgetary cuts (by the states, not by us)
    c. Overlap with a SWIG grant that started this March

Activities Anticipated Next Quarter:

This study is complete

Expected End Date:

Ended 12/31/14 as expected.

Costs:

Total life to date expenses (include this quarter): 34,003.00

Total Approved Budgeted Funds: 81,149.00

Are you within the approved budget plan and categories? yes

Signature:

Date: 3/11/2015.

Non-personal Indirect Cost___%			
TOTAL	5048	10936	15984

*Match is a requirement of some grant programs; list matching funds if specified in contract.

B. Cumulative Total Grant Eligible Costs Claimed from Beginning of Agreement up-to- and Including Current Quarter:

Total Life-to-Date Expenses	$ 34,003
Less Previous Payments Processed	$ 26,757
Total Amount Due Grantee Now:	$ 7,246

C. Personal Services Summary Grantee and 3rd Party Match*:

Date	Name, Affiliation, Title	Rate	Task	Hours	Total Cost
	See Attached				

*Match is a requirement of some grant programs, document match if specified in contract.

NOTE: This certification must be signed prior to reimbursement of costs unless daily time and activity records summarizing personal services performed in relation to the project for each individual employee are signed by the appropriate supervisor and attached.

CERTIFICATION OF GRANTEE AND 3RD PARTY MATCH

I hereby certify that daily time and activity records for each individual detailing the specific hours devoted solely to this project which are distinguishable from work done on other projects during the same time frame, maintained in accordance with all applicable federal, state and general municipal accounting practices and procedures are available in our files for inspection.
