Grant Program, Number and Title:

Subaward Number: GSA 00041
RCN Spotted Turtle Assessment in MD/DE

Contractor: Salisbury University

Project Leader: Eric Leibgold

Abstract:

Like most July-September quarters, we anticipated that no sampling would occur due to decreased turtle activity and hydrologic changes (many ditches and ponds dry up) in this time of year in this location. However, in this time period this year, in addition to being able to complete our data management and submit the data and send in our turtle genetic samples from 2020, we tried to conduct some limited trapping to obtain some more genetic samples from our 2018 sites. We collected 5 additional spotted turtle tissue samples at one site.

Were planned goals/objectives achieved last quarter? Y/N

Progress achieved:

In this time period, our goals were to a) collect more DNA from 2018 sites and b) to submit our RCN data and send in the 2020 DNA samples. We collected more DNA from one site (5 tissue samples) and submitted our data/DNA.

Difficulties encountered in meeting goals and objectives:

Lack of spotted turtle activity (or finding the location of that activity) prevented us from collecting additional DNA from one site we surveyed although we were successful at the other site.

Activities anticipated next quarter:

Next quarter, like most October-December quarters, we will not be conducting field work, but instead planning our trapping schedule for the spring and scouting out our new sites. We will also be submitting our 2020 permit reports for MD and DE and renewing our permits for 2021. We do not anticipate purchasing new supplies as we have most of what we will need, but will purchase some early in 2021.

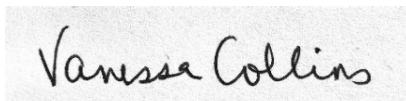

Expected End Date: 6/30/2021

Total life to date expense (include this quarter)	16,548.68
Total approved budget funds:	27,447.00
Are you within the approved budget plan and categories?	Yes

The foregoing information is accurate as of the date set forth below.
